April 12-15, 2019

... I see a time of seven generations when all the colors of mankind will gather under the Sacred Tree of Life and the whole Earth will become one circle again...

With gifted native elders/educators we will participate in a school in the forest, bringing ritual, lessons and activities to use in the classroom through dialogue, story, art, food, ceremony and healing practices for daily life. We will find our pine tree, gather materials and weave pine needle baskets honoring the “basket” at every level - outwardly a container for objects, inwardly a metaphor for receiving new thinking, feeling, and doing out of the values that support individuals, students, community and our mother earth. We will live into the profound primal wisdom of original people - all so needed for the planet to survive today: reciprocity, reverence for and connectedness to all life.
